TECH PROJECTS

EventRecipe

<https://event-recipe.vercel.app/>

Full Stack Application

- React, Bootstrap, Express.js, Firebase Authentication & Storage, TheMealDB API and SQL
- Developed a recipe organization platform enabling users to discover thousands of recipes from TheMealDB API and organize them into custom events for dinner parties, holidays, and special occasions.
- Implemented Firebase Authentication with Google OAuth integration and protected route system, ensuring secure user access to personalized event management features while maintaining seamless user experience.
- Built responsive, mobile-optimized interface using Bootstrap and React Router, featuring dynamic recipe search functionality and intuitive event creation workflows that adapt flawlessly across desktop and mobile devices.

T.Px Hair Studio

<https://tpx-hairstudio-bookingsystem.vercel.app/>

Full Stack Application

- React, Bootstrap, Express.js and SQL
- Developed a booking system for a hair studio using React and backend API integration, enabling customers to schedule appointments through the application.
- Enhanced SQL and API integration skills by designing and implementing efficient data handling and communication between the frontend and backend.

TripPros

<https://trippros.vercel.app/>

Frontend

- React, Bootstrap and Redux
- Developed a travel-themed organizer application with CRUD operations to manage trips, documents and bookings.
- Strengthened knowledge in Redux by implementing state management for complex user interactions and data flow.
